DETAILED ACTION

Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Cancel Claims 1-8.

This application is in condition for allowance except for the presence of claims 1-8 drawn to a semiconductor device non-elected without traverse. Accordingly, claims 1-8 been cancelled.

Allowable Subject Matter

Claims 9-17 are allowed.

The following is an examiner's statement of reasons for allowance: The closest prior art known to the Examiner is listed on the attached PTO 892 and IDS forms. None of the cited references or combinations thereof disclose or suggest doping impurities of a first conducting type into a surface of a collector layer of a second conducting type and thermally diffusing the impurities of the first conducting type to form a base region of the first conducting type in the surface of the collector layer, forming a base electrode

Art Unit: 2812

layer on a surface of the base region and forming an insulating film on a surface of the base electrode layer; and forming a trench, which does not reach the collector layer by etching the base region through an opening created as part of the base electrode layer and the insulating film and forming a sidewall on an inside wall of the trench as required by Claim 9 and dependent Claims thereof. Moreover, the cited prior art does not disclose or suggest forming a base electrode layer made of polysilicon containing impurities of a second conducting type on a surface of the collector layer and forming an insulating film on a surface of the base electrode layer; forming a trench by etching the collector layer through an opening created at part of the base electrode layer and the insulating film and doping impurities of the second conducting type into the trench and into the base electrode layer as required by Claim 13 and dependent Claims thereof. Therefore, the present Claims are allowable over the cited prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
